# Timba Floor 5G Engineered Oak

We are pleased to present you our Timba Floor 5G Engineered Oak Flooring Collection; this product is made in Europe from the very best locally sourced timbers and benefits from using the market-leading and proven Välinge 5G LOC system. This easy to fit mechanism is ideal when you are installing a floor over an underlay and with the added benefit of being suitable to use over underfloor heating installations.

The Timba Floor 5G collection is made in the ever-popular 14mm engineered planks with varying widths from 130-207mm that are very often installed in both domestic and commercial installations alike. The Timba Floor 5G collection fully encapsulates the feeling of elegance, style and beauty in hardwood flooring whether you are looking at a 'Classic' natural finish or 'Premium' style of flooring.

All of the products found in our ranges feature some of today's most sought after colours and finish techniques. In which we have considered a floor style for every room be it narrow and streamlined look or a wide board finish, classic natural oak, deep warming tones or on-trend shaded colours. All very much enjoyed among every client with interior design aspirations.

We genuinely believe installing a Timba Floor will be a decision you will treasure for a very long time. Step inside and enjoy the beauty of natural wood.

## Board Construction

### 1 High Quality European Finishes

We use High-Quality European finishing processes and techniques throughout this range, which delivers a natural elegance into your room.

### 2 4V Bevelled Edge

Each plank features a four-way bevel to each side of the board. This feature outlines the board's unique character and styling.

### 3 5G LOC System

With the Timba 14mm 5G Collection, we only use the best when it comes to our LOC system; making installation quicker, stronger and more reliable.

### 4 3-Ply Construction

The construction of the Timba 5G collection is made from 3 layers of High-Quality sustainably sourced timber, which results in increased stability and prevents product movement.
